Cunningham and Dr. Parnell, for which honorary premiums were lately awarded ; the former on the geology of the Lothians, illustrated by thirty-five coloured sections and a geological map, and the latter on the Ichthyology of the Forth District, illustrated by sixty-seven engraved figures.

ZOOLOGICAL SOCIETY.

April 10, 1838.—Rev. John Barlow in the Chair.

The first communication laid before the meeting was a description by Mr. Owen of the organs of deglutition in the Giraffe, being a supplementary note to his former memoir on the anatomy of that animal*.

Mr. Owen observes that since the Giraffes have been at the Gardens, they have not been known to utter vocal sounds, except once, at the time of coition, when the male uttered a cry like that of the Deer ; and the incapacity of the species in this respect would seem to be indicated by the structure of the *glottis*, the *rima* of which
